

ARMSTRONG IN-LINE AND INSERTION VORTEX FLOW METERS

In-Line Vortex Flow Meter

Armstrong International is pleased to offer vortex technology for measurement of steam, liquid, and gas flows. All AVF in-line models provide multivariable measurement and mass flow output for applications in industrial and institutional environments.

The flow meter is available from ½" (15 mm) (DN 15) to 12" (300 mm) (DN 300) meter sizes handling process temps from -330°F (-200°C) to 750°F (400°C) and process connections up to ANSI Class 600 (PN 64). Multivariable options include temperature, pressure, and velocity measurements for a fully compensated mass flow rate. Output communication is available via analog 4-20ma, HART™ protocol, Modbus, and BACnet™.

Flanged Connection

Wafer Connection

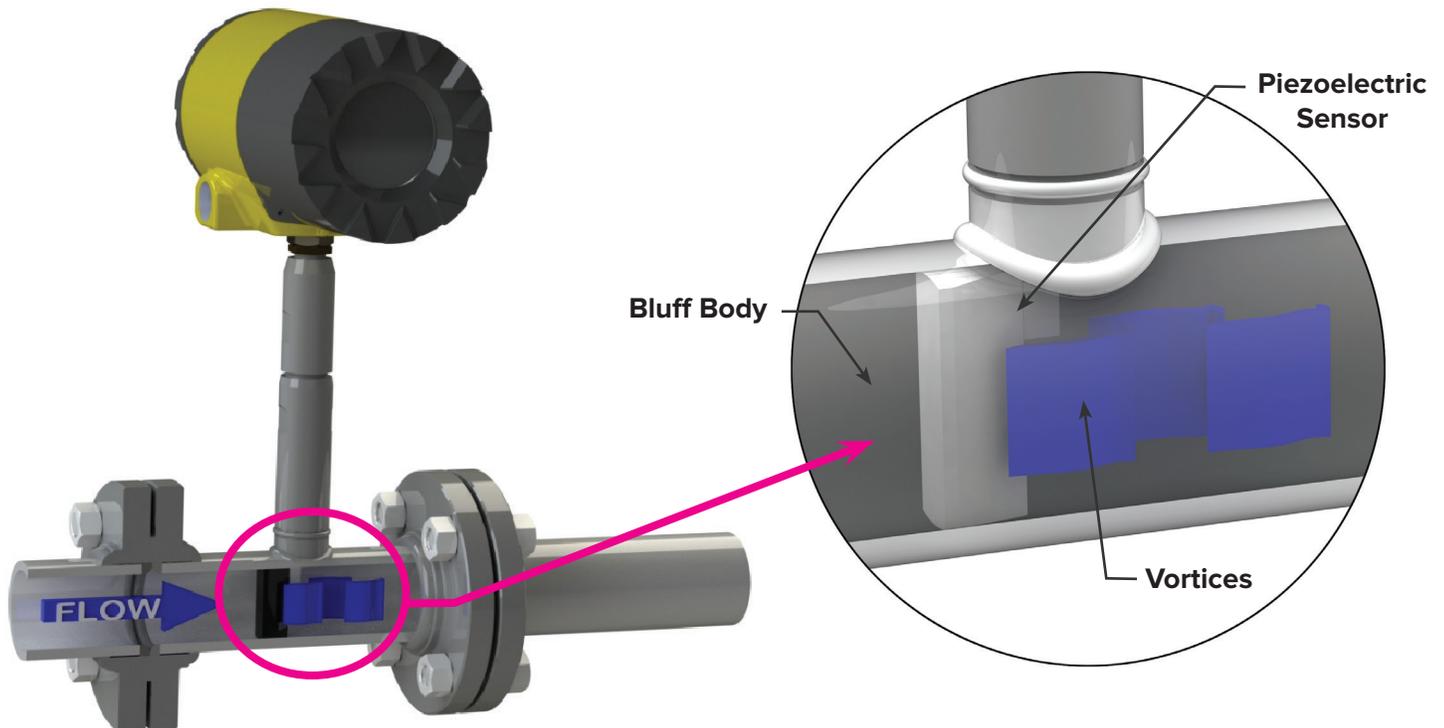

Features

- Volumetric or mass flow
- Velocity, temperature, pressure measurements integral to meter body
- Energy calculation and output available
- 1.5% of rate accuracy or better
- Turndown up to 100:1
- Push button digital display
- Remote electronics available
- FM, FMC, ATEX, IECEx Approved

Vortex Shedder Technology

Since the early 1970s, vortex meters have been used as a versatile, reliable measurement solution. Applicable in a variety of fluids, vortex meters can be easily installed and deliver accurate measurement over a potentially impressive turndown.

Based on the Kármán vortex street, a vortex meter measures the frequency of vortices that are shed behind a bluff body that is placed in a flow stream. As each vortex is shed, it creates high and low pressure zones which are sensed by a piezoelectric crystal. The flow meter's electronics convert these pressure pulses into electrical signals. Because the frequency of the vortices is directly proportional to the fluid's velocity, the electric signals can be used to calculate a flow rate.

Multivariable Options

V1 – Volumetric

Simply measures velocity and provides a volumetric flow rate. Typical for water and non-compressible fluid applications.

V2 – Velocity and Temperature

Added temperature measurement via integral RTD is used to calculate compensated mass flow rate. Typical for saturated steam flows.

V3 – Velocity, Temperature, and Pressure

Integral temperature and pressure sensors for fully compensated mass flow calculations. Capable of providing 3 outputs from a choice of 5 different process measurements: volumetric flow rate, mass flow rate, pressure, temperature, and density.

E1 – Energy

Energy measurement (Btu, joules, calories, Watt-hours, Megawatt-hours, HP-hours) using integral temperature reading for either supply or return side. Must be paired with a second temperature sensor on the opposite side (supply or return) of the process.

Insertion Vortex Flow Meter

Introducing the Insertion Vortex Flow Meter

The AVI insertion models provide all the same multivariable measurement and mass flow output features as the AVF in-line model in a robust, welded design.

The AVI is available for pipe sizes 2" (50 mm) (DN 50) and above with either flanged or NPT process connections up to ANSI Class 600 (PN64). Optional retractor tool provides easy hot-tap installation and removal.

**AVI Model Insertion
Vortex Meter**

**AVI Model with Packing Gland
and Retractor Options**

Features

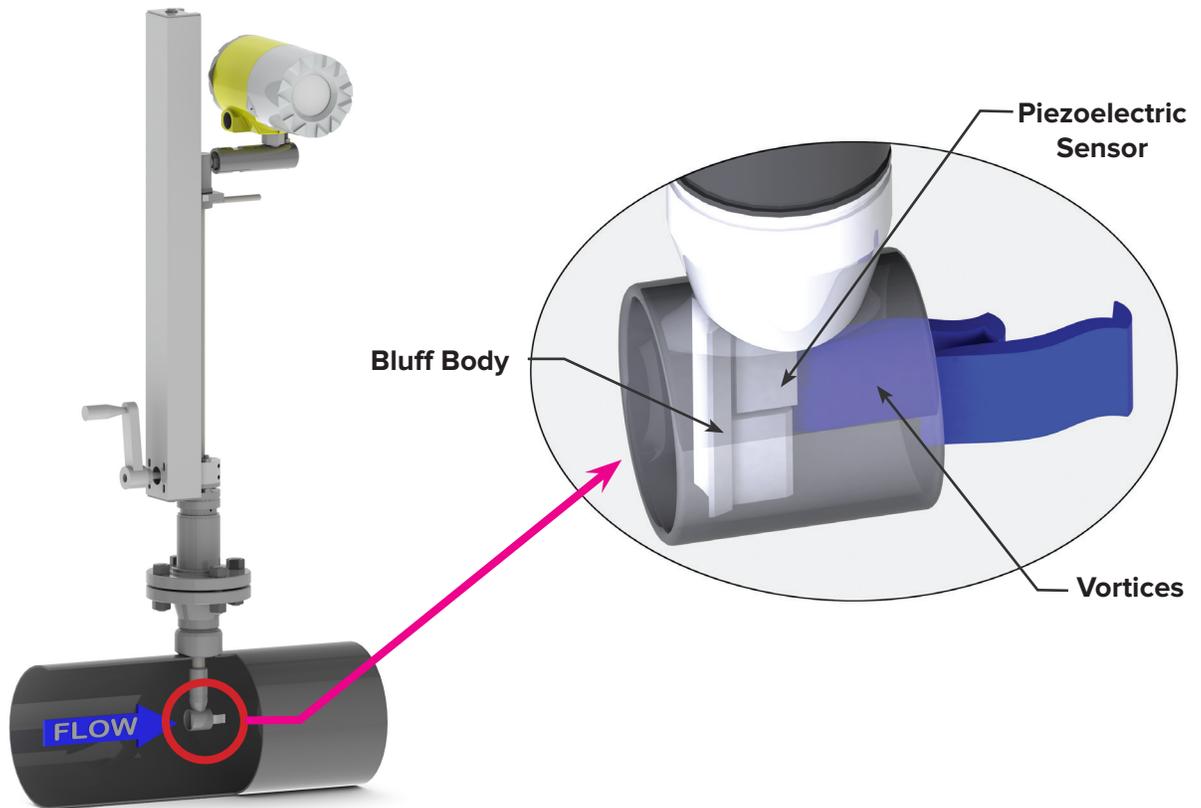

- Compensated mass flow and energy calculations for gases, liquids, and steam
- Hot tap installation does not require shut down or process interruption
- Up to $\pm 1.5\%$ accuracy over a wide turndown in flow rates
- Reliable construction – no moving parts
- Analog, HART™, Modbus, and BACnet™ communication
- FM, FMC, ATEX, IECEx Approved

AVI Model Flow Meter

Insertion Meter Measurement Principle

The insertion vortex utilizes the same operating principle of the in-line meter. However, rather than placing a bluff body across the entire pipe ID, the bluff body is strategically placed in a position within the pipe to measure a single local velocity and yield an average volumetric flow rate.

Multivariable measurement is available through the incorporation of temperature and pressure sensors for an output of compensated mass flow rate for gases, liquids, and steam.

Sizing Considerations

Required Straight Piping Conditions		
Condition	Pipe Diameters (D)	
	Upstream	Downstream
One 90° elbow before meter	10D	5D
Two 90° elbow before meter	15D	5D
Two 90° elbows out of plane before meter	25D	5D

PF8150R	Packing Gland, 2 Inch, 150 LB Flange	40.5 (1 029)	21.5 (546)	52.5 (1 334)	33.5 (851)
PF5016R	Packing Gland, DN50, PN16 Flange	40.5 (1 029)	21.5 (546)	52.5 (1 334)	33.5 (851)
PF8300R	Packing Gland, 2 Inch, 300 LB Flange	40.5 (1 029)	21.5 (546)	52.5 (1 334)	33.5 (851)
PF5040R	Packing Gland, DN50, PN40 Flange	40.5 (1 029)	21.5 (546)	52.5 (1 334)	33.5 (851)
PF8600R	Packing Gland, 2 Inch, 600 LB Flange	40.5 (1 029)	21.5 (546)	52.5 (1 334)	33.5 (851)
PF5064R	Packing Gland, DN50, PN64 Flange	40.5 (1 029)	21.5 (546)	52.5 (1 334)	33.5 (851)

AVI Ordering Information

Product Code	
AVI	Armstrong Insertion Vortex
Process Connections	
CT8	Compression, 2 inch NPT
CF8150	Compression, 2 inch 150# Flange
CF5016	Compression, DN50 PN16 Flange
CF8300	Compression, 2 inch 300# Flange
CF5040	Compression, DN50 PN 40 Flange
CF8600	Compression, 2 inch 600# Flange
CF5064	Compression, DN50 PN64 Flange
PT8	Packing Gland, 2 inch NPT
PF8150	Packing Gland, 2 inch 150# Flange
PF5016	Packing Gland, DN50 PN16 Flange
PF8300	Packing Gland, 2 inch 300# Flange
PF5040	Packing Gland, DN50 PN40 Flange
PT8R	Packing Gland, 2 inch NPT, Retractor
PF8150R	Packing Gland, 2 inch 150# Flange, Retractor
PF5016R	Packing Gland, DN50 PN16 Flange, Retractor
PF8300R	Packing Gland, 2 inch 300# Flange, Retractor
PF5040R	Packing Gland, DN50 PN40 Flange, Retractor
PF8600R	Packing Gland, 2 inch 600# Flange, Retractor
PF5064R	Packing gland, DN50 PN64 Flange, Retractor
Probe Length	
S	Standard Length
C	Compact Length
E	Extended Length
Electronics	
D	NEMA 4X Enclosure
R1	Remote NEMA 4X Enclosure, 50 foot cable (15 meters)
R2	Remote NEMA 4X Enclosure, 25 foot cable (7 meters)
Multivariable Options	
V1	Volumetric
V2	Velocity, Temperature
V3	Velocity, Temperature, Pressure
V4	Velocity, Temperature, External Pressure
E1	Energy
E2	Energy, Pressure
Input Power	
LP	12-36VDC, 25mA, 1W max, loop powered, output option 1 only
DC	12-36VDC, 300mA, 9W max, output options 2, 3, 4, 5, 6, 7
AC	10-240VAC, 5W max, output options 2, 3, 4, 5, 6, 7
Output	
1	One 4-20mA analog output, scaled frequency, one pulse, HART™, LP power only
2	One 4-20mA analog output, scaled frequency, one alarm, one pulse, HART™, DC or AC power
3	One 4-20mA analog output, scaled frequency, one alarm, one pulse, Modbus, DC or AC power
4	One 4-20mA analog output, scaled frequency, one alarm, one pulse BACnet™, DC or AC power
5	Three 4-20mA analog outputs, scaled frequency, three alarms, one pulse, HART™, DC or AC power
6	Three 4-20mA analog outputs, scaled frequency, three alarms, one pulse, Modbus, DC or AC power
7	Three 4-20mA analog outputs, scaled frequency, three alarms, one pulse, BACnet™, DC or AC power
Temperature Options	
T	Standard temperature, Process temperature -330°F - 500°F (-200°C - 260°C)
H	High temperature, Process temperature up to 750°F (400°C)
Pressure Options	
N	No pressure sensor
1	Maximum 30 psia (2 bara), Proof 60 psia (4 bara)
2	Maximum 100 psia (7 bara), Proof 200 psia (14 bara)
3	Maximum 300 psia (20 bara), Proof 600 psia (41 bara)
4	Maximum 500 psia (34 bara), Proof 1000 psia (64 bara)
5	Maximum 1500 psia (100 bara), Proof 2500 psia (175 bara)

AVI CF8150 S D V2 DC 2 T N
